CAPABILITIES

Central Authority Fails IoT Trust for Cybersecurity

Vulnerable devices and increasing attack surfaces necessitate autonomous zero-trust identity orchestration for edge computing

CAPABILITIES

Autonomous Zero-Trust Edge for Cybersecurity

Decentralized identity solution for Edge Computing security

TRACTION

Edge Fleets Need Local Identity for Cybersecurity

Autonomous zero-trust identity orchestration fuels edge computing growth

EDGE COMPUTING MARKET SIZE (): $1

2024

2025

Enterprise adoption of edge computing by

TIMELINE

Autonomous Zero Consensus for Cybersecurity

Enabling secure Edge Computing with decentralized Trust Identity Orchestration

EDGE COMPUTING NODES
Edge Computing Nodes

AUTONOMOUS ZERO-TRUST
Autonomous Zero-Trust

DECENTRALIZED IDENTIFIERS
Decentralized Identifiers

NEURAL-GUARDIAN CONSENSUS
Neural-Guardian Consensus

TRUST IDENTITY ORCHESTRATION
Trust Identity Orchestration

DATA

Autonomous Zero Trust for Cybersecurity

Enabling sub-millisecond authentication for Edge Computing

TRACTION

Autonomous Zero-Trust Scalability for Cybersecurity

Enabling Edge Computing with linear performance growth

AVERAGE AUTHENTICATION TIME

1ms

TIMELINE

Autonomous Zero-Trust Edge for Cybersecurity

Securely integrating hardware-root-of-trust for trusted execution environments

AUTONOMOUS ZERO-TRUST

Autonomous Zero-Trust

TRUST IDENTITY ORCHESTRATION

Trust Identity Orchestration

EDGE COMPUTING

Edge Computing

HARDWARE-ROOT-OF-TRUST

Hardware-Root-Of-Trust

CAPABILITIES

Autonomous Zero Trust for Cybersecurity

Secure authentication for Edge Computing with zero-knowledge proofs

COMPARE

Autonomous Zero Advantage for Cybersecurity

Decentralized identity management outperforms traditional security

Security Approach	Identity Management	Edge Computing Support

TRACTION

Autonomous Zero Trust for Cybersecurity

Early validation from IoT leaders and successful pilots

IOT PARTNERS

5

PITCH DECK

Autonomous Zero-Trust Founders for Cybersecurity

Seasoned security experts with Edge Computing expertise

2026

DATA

Autonomous Zero Edge Growth for Cybersecurity

Driving revenue through secure Edge Computing solutions

TRACTION

Autonomous Zero Funding for Cybersecurity

Supporting Edge Computing Identity Orchestration

PROPOSED FUNDING DURATION
