PITCH DECK

Autonomous Zero-Trust Identity for Edge Fleets for cybersecurity

Investor pitch for technical VCs and senior security architects evaluating edge identity.

CONFIDENTIAL

2026

CAPABILITIES

Central Authority Fails IoT Trust for cybersecurity

Central authority creates a single control-plane failure for IoT devices and edge computing.

CAPABILITIES

DIDs Move Trust To Devices for cybersecurity

Self-healing security layer uses decentralized identifiers (DIDs) and zero-knowledge proofs.

TIMELINE

Our Autonomous Zero-Trust Today for cybersecurity

Decentralized identity orchestration for edge computing security

EDGE DEVICES
Edge Devices

IDENTITY MANAGER
Identity Manager

CONSENSUS ALGORITHM
Consensus Algorithm

BLOCKCHAIN NETWORK
Blockchain Network

AUTONOMOUS AGENTS
Autonomous Agents

TRACTION

Autonomous Zero-Trust Edge for cybersecurity

Enabling secure and efficient identity orchestration for Edge Computing

AUTHENTICATION LATENCY

1ms

CAPABILITIES

O(1) Scaling Avoids Bottlenecks for cybersecurity

Linear growth for Edge Computing security

CAPABILITIES

Hardware Roots Anchor Device Trust for cybersecurity

Hardware-root-of-trust anchors DID keys before each edge session.

CAPABILITIES

Edge Fleets Need Local Identity for cybersecurity

Technical VCs and senior security architects need identity orchestration for bandwidth-constrained edge fleets.

COMPARE

No Central Bottleneck Is The Moat for cybersecurity

Central authority designs add latency, bandwidth dependence, and concentrated trust risk.

Traditional Security

Zero-Trust Edge Computing

RECOMMENDED

Our Solution

ROADMAP

Roadmap Scales Node To Fleet for cybersecurity

Roadmap moves from prototype to edge pilots to production fleet controls.

PITCH DECK

Security Architects Need Execution Depth for cybersecurity

Seasoned professionals in Autonomous Zero-Trust Identity Orchestration for Edge Computing

Our team consists of seasoned security experts with a proven track record in developing and deploying secure and effective solutions.

CAPABILITIES

Capital Funds Proof And Deployment for cybersecurity

Scalable security solutions for Edge Computing drive financial stability

CAPABILITIES

Capital Funds Proof And Deployment for cybersecurity

Supporting Edge Computing Security through Autonomous Identity Orchestration

PITCH DECK

Join the Edge Security Revolution for cybersecurity

CONFIDENTIAL

2026

TRACTION

Neural-Guardian Is Ready For Diligence for cybersecurity

Diligence focus: O(1) verification, low-bandwidth operation, and Neural-Guardian consensus.

TRUST ASSUMED
